

1. In case of choosing a shaded finish, the pieces from different boxes must be mixed to get a random shaded.

2. Clean and moisten the wall.

3. Apply a layer of glue cement on the wall.

4. Apply glue cement on the tile.

5. Place the tiles, the joint being around 3 to 4 mm and varying according to pieces since they are handcrafted, so the dimensions vary between pieces.

6. Fill joints with white or colored grouting material.

7. Finally, it must be cleaned with soap and water, removing the grouting remains with a sponge.

For **handmade tile** cleaning and maintenance, use soap and water routinely.
